## IT, Telecom, media

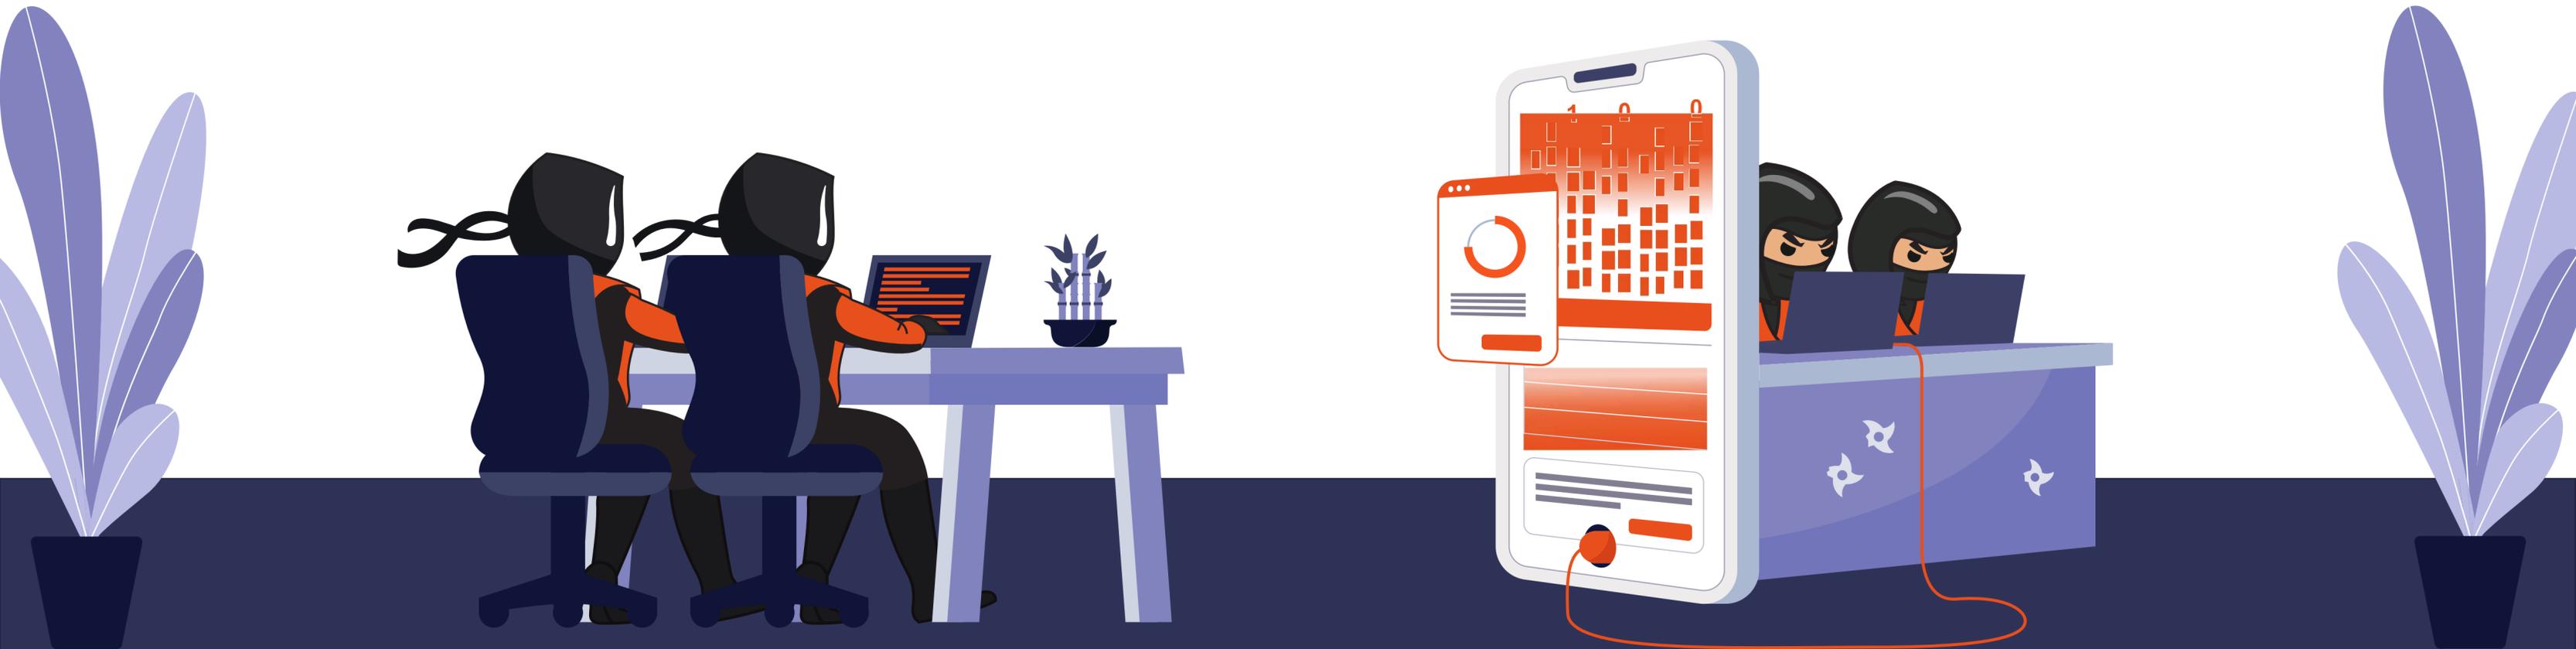

## Public sector

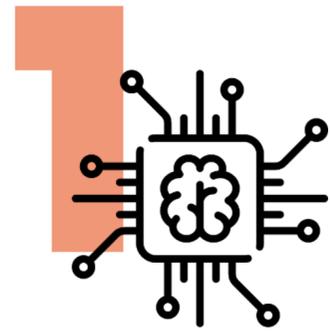

# Problem

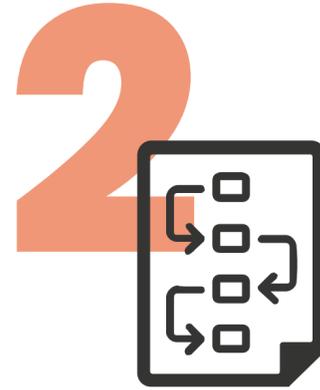

**We spent too much time working on solving the same problems of different clients**

# Resulting in:

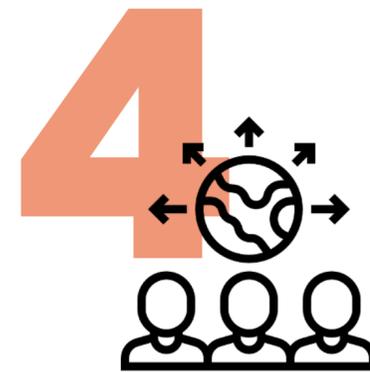

**Pricey  
developments**

**Requirement  
mismatch**

**Late-to-market**

**Technology “mash”**

# We have concluded that:

**Business logic and software technology are  
mixed/ intermingled**

# Solution

**We developed an in-house platform that allows to  
clearly separate the two:  
JUDO captures business and enables to reuse  
architecture**

# Track record

# Next steps

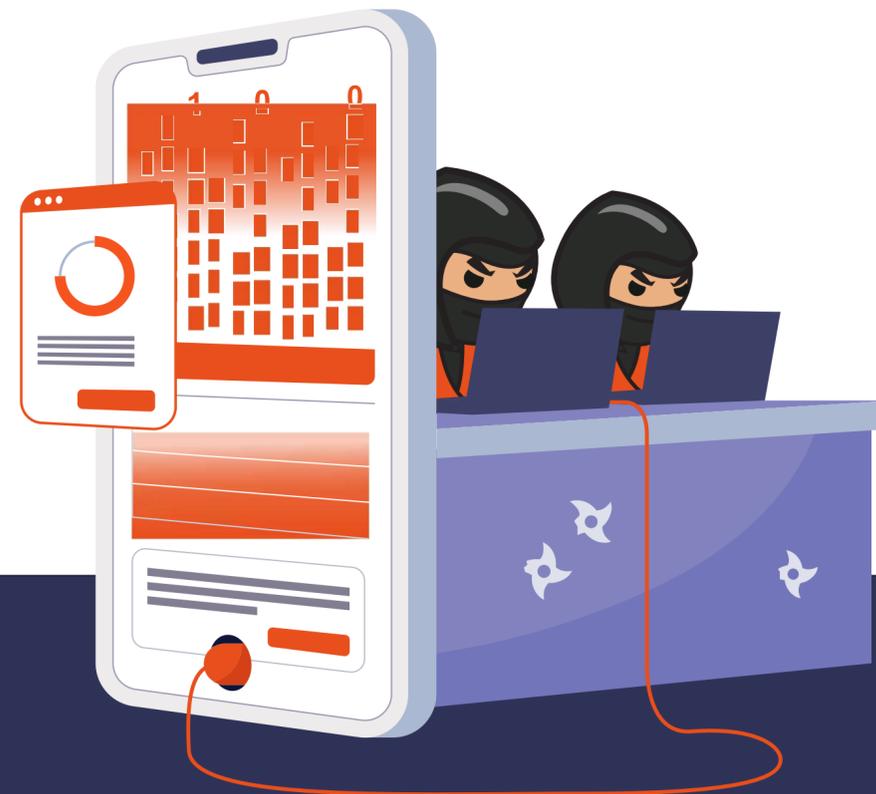

**Create a market ready product**

**Increase product value by adding must have features**

**More efficient teamwork support**

**Cloud-based modelling tool**

**Case management modelling**

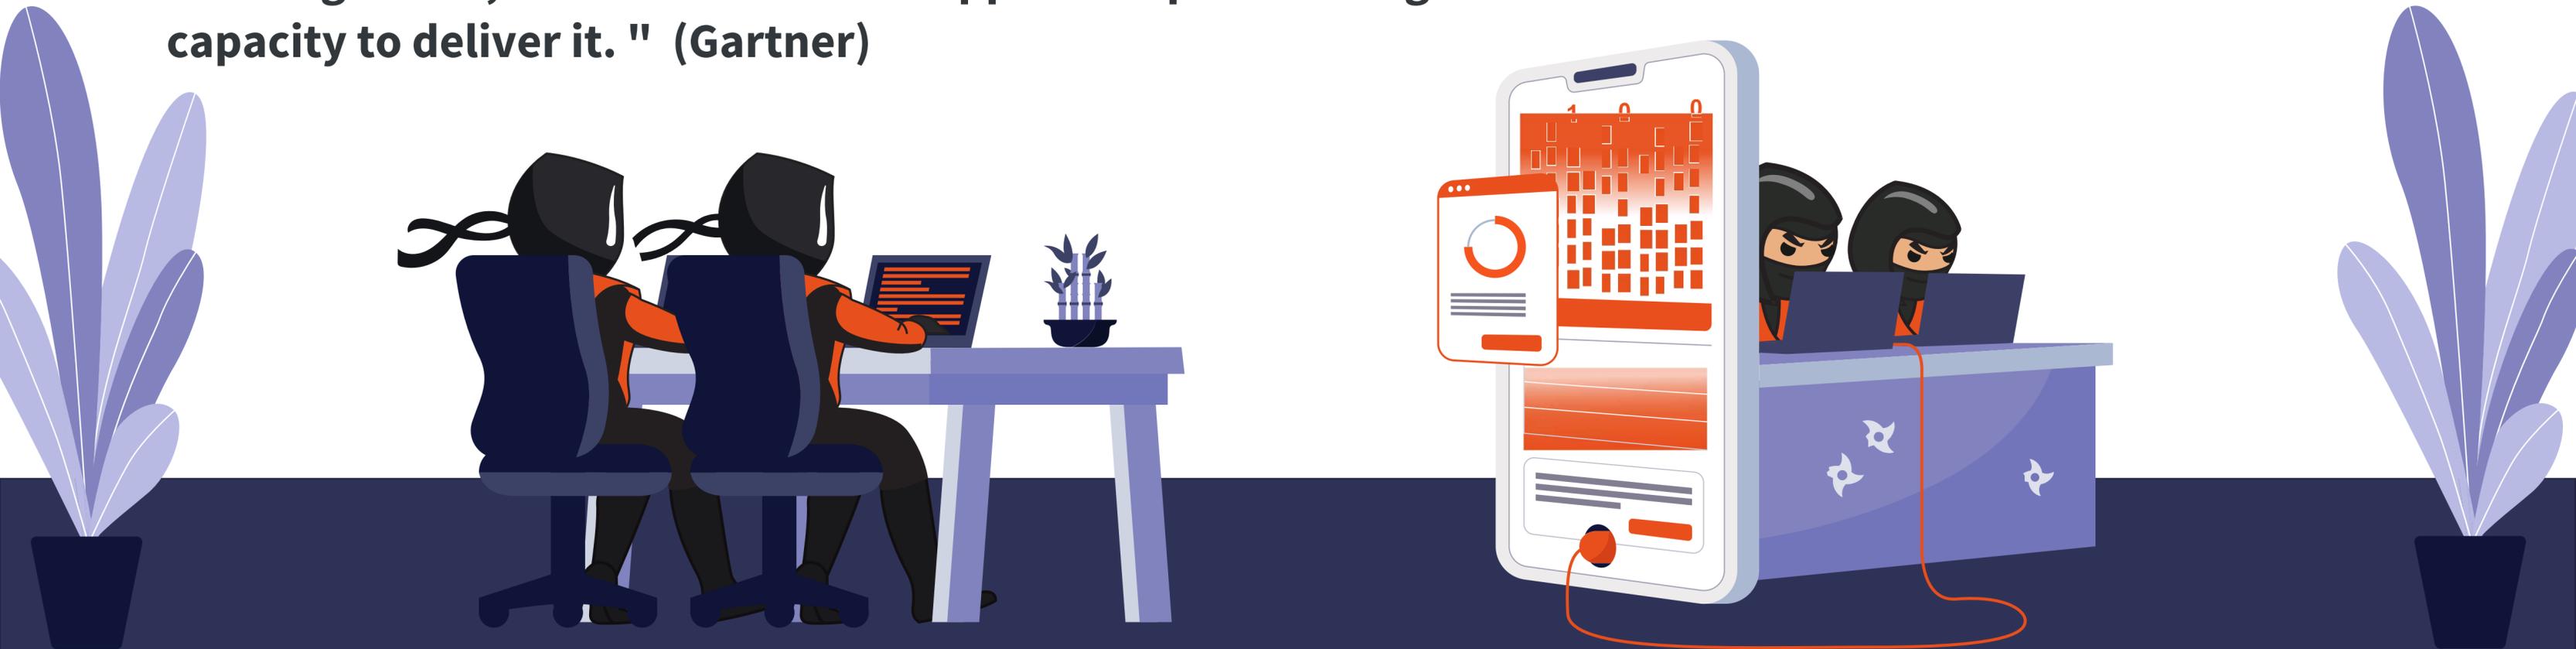

# The market

Forrester calls the Low Code market a “high growth” area, and predicts it will grow to over \$10 Billion in 2019.

“By 2020, at least 50 percent of all new business applications will be created with high-productivity toolsets, such as low-code and no-code application development platforms.” (Gartner)

“Through 2021, market demand for app development will grow at least five times faster than IT capacity to deliver it.” (Gartner)

# Competitors

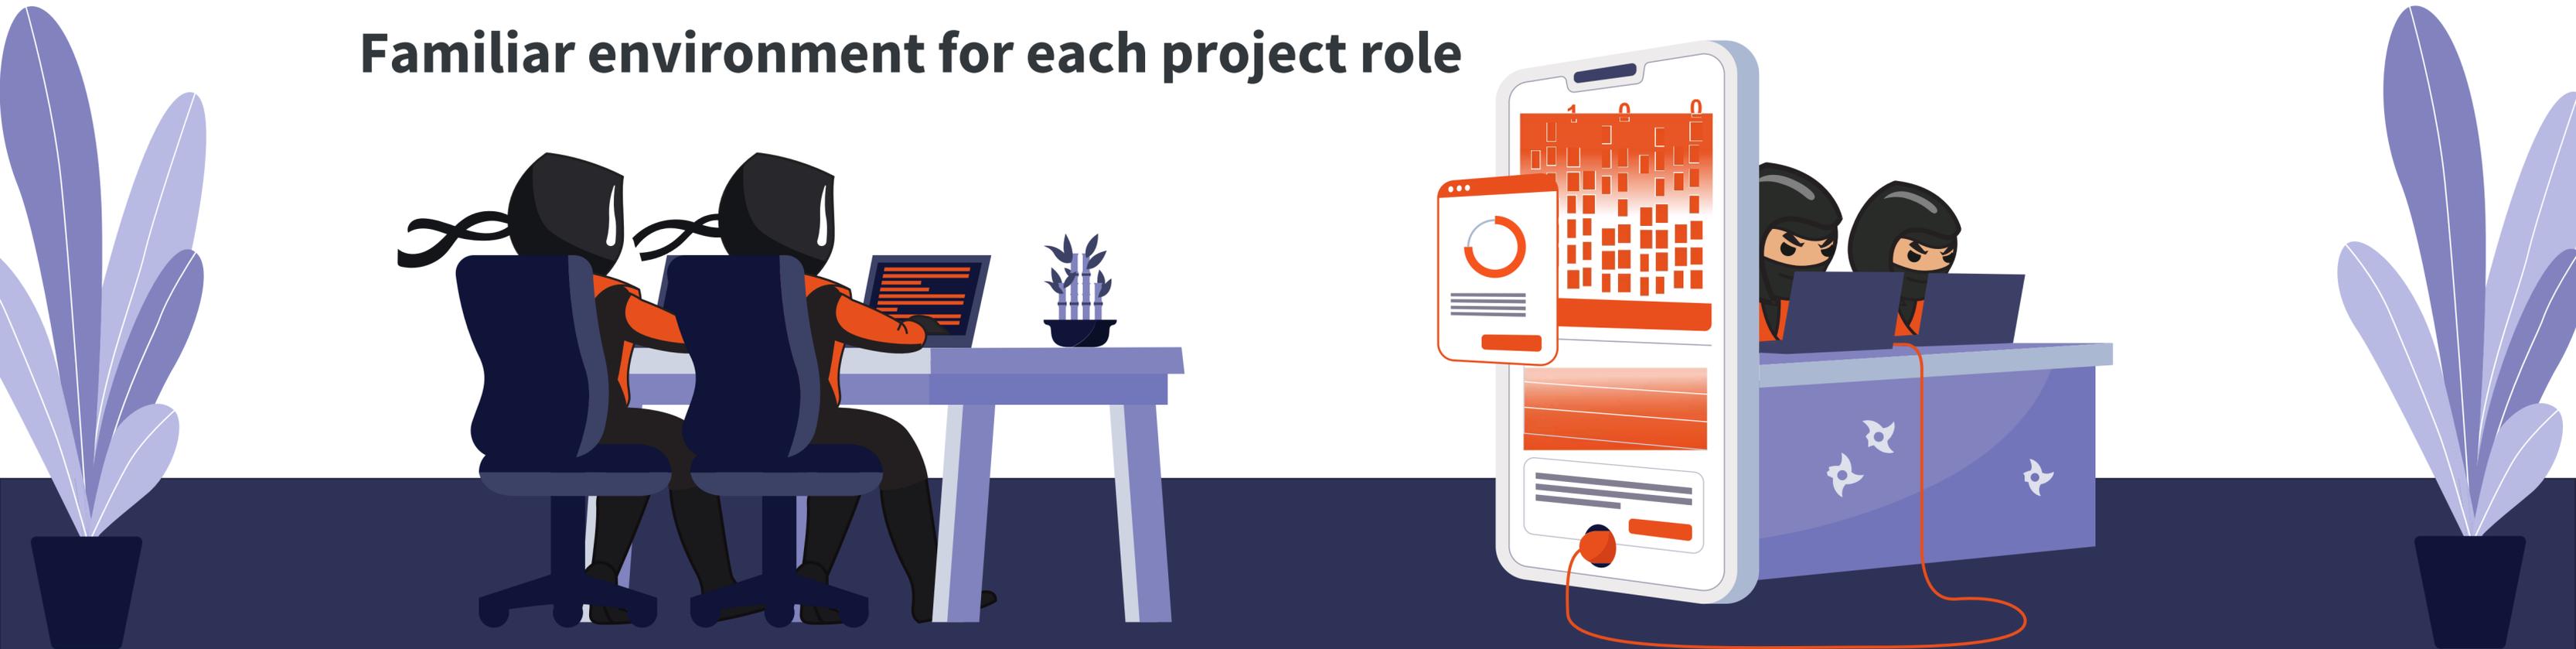

## Key players

Mendix, OutSystems, Microsoft, Salesforce

## But no one offers our differentiators

Open architecture

Familiar environment for each project role

## Why BlackBelt?

Blackbelt is an innovation consulting and outsource software development company with the mission to guide companies through their entire innovation lifecycle.

We support you during the ideation and help create a prototype in a ridiculously short time. Our senior core team is capable of launching a sustainable development selecting the appropriate architecture, roadmap, and agile tools. You can easily continue the development with a brand new out-staffed team we build up for you in Budapest. Need more control? No problem. We transform this out-staffed organization into an R&D center of you, located in Budapest.

## Why Budapest?

- 1 Hungary is one of the **largest commercial partner of USA** in CEE. USA is the 2nd largest investor in Hungary.
- 2 **Flourishing tech community**, lively startup location, leading tech city in CEE.
- 3 Well performing **IT development centers** for companies like Citibank, GE, Morgan Stanley, ExxonMobile etc.
- 4 **Excellent travel connections** to major cities in Europe and USA.
- 5 Well-developed infrastructure, **highly-skilled workforce**, and competitive price.
- 6 We are registered in EU, with **EU employees**.

## Blackbelt values

- 1 Sustained almost linear growth since establishment, reaching 10 million Euros in 2019
- 2 Self-financed since establishment
- 3 Above average retention rate of highly qualified IT experts
- 4 Judo low code development platform in an increasing technology quadrant
- 5 Ease of investment with Blackbelt Holding cPLC
- 6 Judo in contained unit with own P&L and staff

## We are rapid.

- 1 We do **agile**.
- 2 We build demo **in 1 week**, develop minimal viable product **in 2 months** utilizing our **low-code** techniques.
- 3 We build new teams quickly. We **start a project** with our team **in 2 weeks**. We can hire and form **your new, exclusive scrum team in 2 months**.

## We are reliable.

- 1 Our team made of **senior developers** being experienced in business-critical IT projects.
- 2 We are picky to hire and develop the **best developers** in the country, the **masters of technology**.
- 3 Add our **established QA** know-how we continuously focus on **delivering the quality**.
- 4 Our services are **transparent** for our clients.
